

Tanish Choudhary

Dehradun, Uttarakhand, India | cybersectanishchoudhary@gmail.com | linkedin.com/in/tanish-choudhary | TryHackMe: Top 3%

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (DIT University, 2026) specializing in offensive security and penetration testing. Ranked in the top 3% globally on TryHackMe with Jr. Penetration Tester certifications. Hands-on experience in digital forensics, OSINT, incident response, and malware/AV-evasion research gained through a state-level cybersecurity internship (APCSIP-2025) and independent CTF practice on Hack The Box. Complements offensive-security skills with backend development experience, enabling a strong understanding of how applications are built and how they break. Seeking a full-time role in penetration testing, security analysis, or offensive security engineering.

EDUCATION

DIT University

Dehradun, Uttarakhand

Bachelor of Technology — Computer Science & Engineering — Aug 2022 – Nov 2026

PROFESSIONAL EXPERIENCE

Web Operation Engineer — Teleperformance

Apr 2026 – Jun 2026

Teleperformance — India

- Provided technical support for a domain registration and website-builder platform, resolving customer issues related to DNS/nameserver configuration, domain transfers, renewals, and account privacy settings.
- Diagnosed and triaged SSL certificate, hosting, and site-publishing issues, escalating complex or suspected fraud/phishing-related cases through structured SLA-driven workflows.
- Investigated account-security concerns (unauthorized access, domain hijacking attempts) and guided customers through account recovery and security best practices.

Cybersecurity Intern — APCSIP-2025

June 2025

Uttar Pradesh Police, Amroha Cyber Crime Unit — Amroha, Uttar Pradesh

- Assisted investigators in cybercrime case analysis, correlating digital artefacts across seized devices, logs, and cloud accounts.
- Conducted OSINT investigations and digital forensics examinations; produced structured evidence reports for law-enforcement proceedings.
- Supported incident-response workflows including log collection, timeline reconstruction, and extraction of indicators of compromise (IOCs).
- Contributed to public cyber-awareness campaigns on phishing, social engineering, and safe online practices.

TECHNICAL SKILLS

Security & Offensive: Penetration Testing, Web App Security (OWASP Top 10), OSINT, Malware Analysis, AV Evasion, Privilege Escalation

Security Tools: Metasploit, Burp Suite, Nmap, Wireshark, SQLMap, Gobuster, John the Ripper, Netcat

Frameworks & Concepts: MITRE ATT&CK, OWASP, TCP/IP, DNS, HTTP/S, Active Directory Attacks, Post-Exploitation

Platforms: Kali Linux, Windows / Active Directory, Docker, Git/GitHub, TryHackMe, Hack The Box

Languages & Scripting: Python, JavaScript (Node.js), C/C++, PowerShell, Bash

Backend Development: Node.js, Express.js, RESTful API Design, MongoDB (Advanced Aggregation), JWT Auth, API Testing with Postman

KEY PROJECTS

Malware & Evasion Research Lab

2024

C/C++, Python, Windows Internals, MITRE ATT&CK

- Developed custom payloads applying Sektor7 Malware Development Essentials techniques: process injection, shellcode encoding, and AV/EDR evasion.

Secure RESTful API Backend

2025

Node.js, Express.js, MongoDB, JWT, Postman

- Built a scalable REST API with full CRUD operations, JWT-based authentication, and role-based access control for a multi-user application.
- Implemented advanced MongoDB aggregation pipelines for analytics endpoints, optimising index usage to cut query latency significantly; validated all 3+ endpoints via Postman test suites.

Scalable URL Shortening & Management API

2026

Node.js, Express.js, PostgreSQL, Drizzle ORM, JWT, Zod, Docker, Vercel

- Built and deployed a RESTful URL shortening API featuring JWT authentication, Zod validation, short-code generation/redirection, and user-specific URL management.
- Implemented a modular backend architecture with PostgreSQL/Drizzle ORM and Dockerized local development, then deployed the production API on Vercel.

Covid-Testrone — 2nd Place, ATL Marathon by NITI Aayog

2021

IoT, Arduino, Python

- Designed and built an automated rapid-testing device integrating IoT sensors with a real-time web dashboard; won national 2nd place at the ATL Marathon (NITI Aayog) against hundreds of teams.

CERTIFICATIONS & TRAINING

Jr. Penetration Tester — TryHackMe | Pre-Security — TryHackMe | Cyber Security 101 — TryHackMe | Malware Development Essentials — Sektor7 Institute | SQL Injection Attacks — EC-Council | Introduction to Dark Web, Operations & Cybercrime — EC-Council

ACHIEVEMENTS & RECOGNITION

- Competitively selected for APCSIP-2025, a state-level cybersecurity internship programme run by the Uttar Pradesh Police.
- Active HTB CTF player — regularly solves Web, Pwn, and Forensics challenges on Hack The Box.
- National 2nd Place — ATL Marathon by NITI Aayog for the Covid-Testrone innovation project.
